Healthcare Support with HelpAge India

Integris Medtech Limited is committed to making a positive impact beyond business. As part of our Corporate Social Responsibility (CSR), we collaborate with HelpAge India to deliver essential healthcare services in and around Dehradun, where the manufacturing plants of our subsidiaries are located.

Through this partnership, HelpAge India operates a Mobile Health Unit (MHU) that provides door-to-door medical check-ups and OPD services for underprivileged communities. The MHU, staffed by a dedicated team comprising a doctor, pharmacist, social protection officer, and field staff, reaches old age homes, slums, rural settlements, and community centres to ensure timely access to preventive and primary healthcare.

This initiative reflects our commitment to extending healthcare to the most vulnerable sections of society, bridging gaps in accessibility, and supporting healthier communities.
